DIGIVID Mini-Bulletin

Welcome to our sixth DIGIVID Mini-Bulletin

We would like to update you regularly regarding the DIGIVID progress with our DIGIVID Mini-Bulletin.

We wish you a MERRY CHRISTMAS and a HAPPY NEW YEAR! We are looking forward to the next DIGIVID year (until April 2023).

DIGIVID News

DIGIVIDget

We are happy to announce that the implementation of the DIGIVIDget is finished (some polishing activities will be done in the background).
We have now implemented the following Modules in German and English:
- Modul 1:
  - DE: Grundlagen Digitale Kompetenz
  - EN: Basic Digital Literacy
- Modul 2:
  - DE: Digitale Lebenswelten verstehen und reflektieren
  - EN: Understanding and Reflecting on Digital Life Worlds
- Modul 3:
  - DE: Digitale Materialien gestalten
  - EN: Designing Digital Materials
- Focus Topic:
  - DE: Inklusive Bildung und Barrierefreiheit
  - EN: Accessibility and Inclusion
- Focus Topic:
  - DE: Urheberrecht, Lizenzen,Open Educational Resources
  - EN: Copyright, Licenses, Open Educational Resources

You will find the DIGIVIDget at: https://digivid.isds.tugraz.at/
You are welcome to register for free and try it out yourself. We would also appreciate, if you distribute the link to potential interested persons.

Learning and Training Activities (LTTAs)

As planned, we have conducted in Austria, Germany and Norway our learning and training activities.

LTTA in Austria

In Austria, we were able to recruit 11 participants via the "Private Pädagogische Hochschule Augustinum" and conducted our workshop series with in-service teachers providing the following content:

- Workshop 1 (5.10.2022) - Einführungs-Workshop: This workshop was held together with the participants from Austria and Germany, to give an introduction about the project, to introduce the DIGIVIDget and to set the stage for the evaluation. Afterwards, the Austrian participants continued with the topics about "Sie können Kriterien anwenden, um Informationen kritisch auf Ihren Wahrheitsgehalt und ihre Qualität hin zu beurteilen". In addition we gave an introduction regarding basic understanding of general terms used in the Internet (e.g. Browser, Cloud, …)
- Workshop 2 (12.10.2022): File Sharing & Data security: In this workshop, we presented content about the following topics: File Sharing, which was about how to share files securely over the internet. The second topic was about data privacy and security.
- Workshop 3: (19.10.2022): Medien Sozialisation and Gefahren im Internet. The first topic was about how digital media influences teachers, students, pupils and in the second topic we made the participants aware of dangers or pitfalls that could occur while surfing the Internet.
- Workshop 4 (9.11.2022): Digitale Barrierefreiheit: In this workshop we talked about digital accessibility on the web and the accessibility of digital learning materials and tools, respectively. Moreover, participants got to know technologies that support inclusive teaching and learning in schools and universities.
- Workshop 5 (16.11.2022): Copyright, Licenses and OER: In the last topic, we presented our participants content about copyright and law, creative common licenses and what open educational resources are.

In all workshops (but the last one), the participants received some homework, which they had to "prepare" for the subsequent workshop.
Additionally, we conducted a common reflection session at the beginning of each workshop (but the first one) was held. The goal was to reflect together with the participants about the homeworks and what they were able to put into practice regarding the previous workshop content..

We also prepared 2 questionnaires, which we sent out in the first and the last workshop. Overall, the feedback we received was very, very good and all participants were very happy with the knowledge they gained through our LTTA..

LTTAs in Germany

In Germany, also 5 LTTA sessions took place. The final session of the LTTA at TU Dresden did lead to a very insightful discussion regarding possibilities and requirements for the implementation of the DIGIVID training that's why I like to report briefly in the newsletter. Foremost, a technical discussion regarding possibilities and requirements for the implementation of the DIGIVID training was held via ZOOM with the Trainer, Prof. Dr. Thomas Köhler, the Director of the TU Dresden Center for Open Digital Innovation and Participation.

LTTA in Norway

In Norway the learning activities were organized as single workshops with in- and pre-service teachers in schools, and with teaching assistants at the university level. Workshops with teaching assistants were conducted in cooperation with Excited, the Norwegian Center for Excellence in IT education (https://www.ntnu.edu/excited). At the beginning of the workshops, participants received a brief introduction of the project and of DIGIVIDget. Participants had then the possibility to familiarize with the system by performing a set of predefined tasks and navigate different content. Finally, participants had the possibility to discuss their experience with the system and the relevance of the curriculum for them.

User studies

In Austria, in the wintersemester 2022/23 36 students of the Master's program "Inclusive Education", 23 primary school teacher students (Bachelor's program) and 4 secondary school teacher students (Master's program) learned the basics of digital accessibility and assistive technologies with the help of the DIGIVIDget.

Follow-up user studies are in planning.

DIGIVID ForeCast

Multiplier Events

In the next months, we will focus on the preparation of our Multiplier Events, which will take place in February / March 2023.
We are currently setting the dates, and when this is fixed we will kindly invite you to the event and we will kindly ask you to distribute the invitations via your networks.

Dissemination

- **All-Digital lightning talk + Marketplace** (Monica Divitini) (All-Digital is a pan-European association aiming at promoting digital skills, with more than 70 members) Presentation available at
  https://all-digital.org/wp-content/uploads/2022/09/20220930-8.-Divitini_DIGIVID-LT-ADSummit2022.pdf
- Poster presentation at the event celebrating 100 year of teacher education at NTNU (Monica Divitini). Poster available for a week in two campus.
  https://www.ntnu.no/laerer100-konferanse
- Talk at the **UNESCO "Global Media and Information Literacy Week"** (Angela Fessl): "The DIGIVIDget - An innovative technology-driven approach to become information literate."
